

CARBON 49

USB MIDI Controller

Samson's Carbon 49 USB MIDI Controller makes musical performance and production accessible to everyone. For seasoned musicians and young creators alike, the Carbon 49 offers versatile, yet easy-to-use features in a compact, lightweight controller that's well-suited for the stage and studio.

The Carbon 49 offers players a semi-weighted keyboard comparable in feel to that of pro-level instruments. Its 49 velocity-sensitive keys allow you to accurately capture the full dynamics of a performance. In addition, the Carbon 49's dedicated Transpose and Octave buttons, as well as its classic Pitch Bend and Modulation wheels, allow you to expand the keyboard and enhance your overall musical expression.

Take control of your music software with the Carbon 49's assignable data encoder and volume slider. For easy editing, players can use the Shift key to adjust up to 14 performance-related control parameters. Also, the Carbon 49's 3-digit, 7-segment LED displays the behavior of every function in real-time. Designed with the iPad in mind, the Carbon 49 features an integrated iPad stand and can be used with your favorite MIDI apps via Apple's Camera Connection Kit. The Carbon 49 can even be directly powered by the iPad.
